

GTA 16-Week Scale-Target Nutrition Plan

Mobile-first weekly template for a 21-year-old, 6 ft 3 in, 168-172 lb active worker lifting in the evening. Built for the 190-195 lb week-16 scale target while reporting, not hiding, the body-composition cost.

Research and price access date: September 3, 2026. All money CAD. Whey label calories/carbohydrate/fat remain intentionally blank until read from the tub.

Assumptions

Shopping geography

- Home base assumed to be Milton, Ontario.
- Costco anchor: **Costco Burlington - 1225 Brant St, Burlington.**
- Regular second stop: **Food Basics, 500 Laurier Ave, Milton.**
- Conditional bulk/spice stop: **Iqbal Foods, 4099 Erin Mills Pkwy, Mississauga.**

Price handling

- Costco prices shown are usually **Same-Day (marked up)**, not invented warehouse prices.
- Direct prices are location-sensitive snapshots accessed September 3, 2026.
- Unverified shelf prices use the required **ESTIMATE - CHECK IN STORE** status with a confidence note.
- Most basic groceries are zero-rated; restaurant and many supplements may carry Ontario HST.

Nutrition data

- Packaged foods use the cited Canadian label; plain foods use Canadian Nutrient File-style values.
- Meal arithmetic rounds to the nearest 1 kcal and 0.1 g internally; displayed totals tolerate **+/- 5 kcal and +/- 1 g.**
- Chicken values are matched to **RAW** boneless skinless thigh; rice/lentils/oats to **DRY** weight.

Whey placeholder

- Your tub is treated as **24-25 g protein per about 30 g scoop.**
- Wkcal, Wcarb and Wfat mean the exact label values per scoop.
- The current DIESEL product family appears compatible, but **your physical tub label wins** for both macros and ingredients.

1. Reality-check the goal, then plan to it anyway

+18 to +27 lb

Required total scale gain

**1.13-1.69
lb/wk**

Required weekly pace

0.65-1.00%

Current body weight per week

190-195 lb

Scale target has precedence

Plain reality: off-season evidence commonly favours roughly 0.25-0.5% of body weight per week for more favourable body-composition outcomes. At 170 lb that is about 0.43-0.85 lb/week. Your midpoint target is about 1.41 lb/week, so it is materially faster and its upper end is roughly double the favourable range.

Likely composition

- Some gain can be muscle, particularly with progressive training and sufficient protein.
- Early gain will also include glycogen, associated water, sodium-related fluid and more food in the gut.
- At the requested pace, **meaningful fat gain is likely**. It is not credible to label 18-27 lb as lean tissue.
- No percentage is assigned to water/glycogen/gut fill because the prompt data cannot support one.

Tracking signals

- **Weight:** use a 7-day rolling average only.
- **Waist baseline:** day one, measure at the navel three times under the same conditions and average.
- **Waist flag:** baseline + **4.0 cm**. This is an operational report threshold, not a clinical cutoff.
- **Important:** the waist flag never cuts calories. Only a projected finish above 195 lb can do that.

Planned ending, not improvised ending

After week 16, hold the achieved intake for 7-14 days while the scale settles, then run a 10-16 week cut using an initial 400-600 kcal/day reduction, targeting roughly 0.5-0.75% of body weight per week. Keep lifting and keep protein near 180-200 g/day. Remove the same +250 modules used during the gain phase before rewriting meals.

Evidence basis: [Iraki et al., off-season bodybuilding review](#).

2. Calories, protein and intake-response tracking

Maintenance estimate - estimate only

Mifflin-St Jeor RMR, midpoint 77 kg: $10 \times 77 + 6.25 \times 190.5 - 5 \times 21 + 5 = 1,861$ kcal/day Active-job/training factor 1.70-1.80: $1,861 \times 1.70-1.80 = \text{about } 3,163-3,349$ kcal/day

The formula suggests about 3,100-3,400 kcal maintenance. Your recalled 2,200-2,800 kcal intake with static weight points lower, but the recall is untracked. Neither estimate is validated. This plan resolves the mismatch by feeding a known amount immediately and measuring the response.

Provisional day-one intake: 3,300 kcal/day. This is an appetite-limited start, not a promise that 3,300 will be enough for the final target. Based on the formula, the full target may require 3,550, 3,800 or another +250 step. The tracker decides.

Whey-label correction - makes 3,300 exact

The template before whey is **3,186 kcal, 151.7 g protein, 425.3 g carbohydrate, 100.6 g fat and 36.6 g fibre**. Add one scoop of whey:

Uncorrected calories = 3,186 + Wkcal Difference $D = 3,300 - (3,186 + Wkcal)$ New breakfast honey = $20 \text{ g} + D / 3.04$

- Keep the 15 g pre-workout honey unchanged.
- If calculated breakfast honey is between 5 and 40 g, use it.
- If it falls outside that range, keep breakfast honey at 20 g and adjust olive oil by $D / 8.84$ grams instead.
- Example only: if the tub says 120 kcal/scoop, $D = -6$, so breakfast honey becomes about 18 g. The tub label remains authoritative.

Protein target

Target 175 g/day; acceptable operating band 165-185 g/day. At 76-78 kg, 175 g is about 2.24-2.30 g/kg now and about 1.98-2.03 g/kg at 190-195 lb. This is a transparent extrapolation from resistance-trained evidence, not an enhanced-specific formula. ISSN identifies 1.4-2.0 g/kg/day as sufficient for most exercising people, and bodybuilding literature commonly works around 1.6-2.2 g/kg/day. The menu sits slightly above the upper current-weight edge so the target still works after body weight rises.

Evidence: [ISSN protein position stand](#) and [off-season bodybuilding review](#).

14-day intake-response protocol

1. Every morning: use the bathroom, then weigh before food/drink, in minimal clothing, on the same hard-floor scale.
2. Log every ingredient in its stated weight state, including cooking oil, honey, milk and restaurant food.
3. Log total calories, protein, sleep duration, training, bowel comfort and unusual high-sodium meals.
4. Do not interpret single readings. The first valid rolling average is day 7.
5. Compare the mean of days 1-7 with days 8-14. This is **intake-response tracking**, not a clean maintenance measurement.
6. **Do not cut calories because of the initial jump.** Early glycogen, water, sodium, inflammation and gut content can move the scale. Waist alone also never triggers a reduction.

Decision rule after day 14

Observed result	Action
Less than 90% calorie adherence, fewer than 12 useful weigh-ins, or obviously noisy data	HOLD - collect seven more days. Do not force a correction from weak evidence.
Rolling pace under +0.5 lb/week and the projected week-16 finish is below 190 lb	Add one named +250 kcal module .
Pace about +0.5 to +1.5 lb/week and projection is 190-195 lb	Hold. Report waist/body-composition direction without changing intake.
Pace above +1.5 lb/week but the projection is still at or below 195 lb	Hold and report. The scale target has precedence; do not react to one early jump.
Projection is above 195 lb on two consecutive weekly reviews with at least 90% adherence	Remove the most recently added 250 kcal module .
Conflicting scale, sodium, sleep or digestion signals	HOLD - collect seven more days.

Projection = current 7-day average + (weekly trend x weeks remaining)

Named +/-250 kcal modules

Module	Add exactly	Approximate change	Best use
Rice Drive	55 g rice DRY + 6 g olive oil AS PACKAGED	+254 kcal, +3.9 g protein, +44 g carbohydrate, +6.4 g fat	First choice when training/work carbohydrate feels useful. Split across Box A/B.
PB-Honey Blend	30 g peanut butter AS PACKAGED + 20 g honey AS PACKAGED	+246 kcal, +8.1 g protein, +23.5 g carbohydrate, +16 g fat	Lowest stomach volume; blend into the shake.
Yogurt-Raisin Bowl	200 g plain Oikos AS PACKAGED + 45 g raisins AS PACKAGED	+256 kcal, +23.4 g protein, +42.6 g carbohydrate	Use when protein adherence is slipping.
Removal rule	Remove the exact last-added module	About -250 kcal	Never redesign the menu in response to one week.

Reading the scale

- **Weeks 1-3:** expect more noise from glycogen restoration, water carried with glycogen, sodium changes, larger gut content, training soreness and possible creatine-related intracellular water.
- **Later:** trust consecutive 7-day averages. A stable multi-week slope is more useful than any narrative about one heavy morning.

Mifflin formula source: [Mifflin et al.](#). Nutrient reference: [Canadian Nutrient File](#).

3. Adherence-triggered phases

PHASE A

Appetite-limited

Entry: current state. Start at corrected 3,300 kcal.

- Use oil, peanut butter, 2% milk, raisins, honey and white rice.
- Drink most zero-calorie fluids between meals, not immediately before them.
- Reduce giant salads, broth soups, bran cereal, popcorn, brown rice, huge crucifer/berry bowls and more than one cup cooked legumes in one meal.

PHASE B

Full surplus

Enter only when all are true:

- Target hit on at least 6 of 7 days.
- No moderate digestive complaint lasting more than two days.
- Fibre floor hit on at least 5 of 7 days.
- Projection remains below 190 lb.

Add one +250 module, usually Rice Drive.

PHASE C

Final drive

Enter when: Phase B intake is hit 6/7 days for two weeks, digestion is stable and projected finish is still under 190 lb.

Add a second +250 module. Review every seven days; another +250 step is allowed after a further 14 compliant days if the projection still misses 190. Calories are not capped at 3,800 merely because the estimate began lower.

Constraints that remain binding in every phase

Floor / ceiling	Rule
Fibre	Floor 30 g/day; target 34-38 g. Base template is about 36.6 g.
Produce	At least five operational servings/day: one serving = 100 g fresh/frozen or 30 g dried. Base template is about six.
Carbohydrate	Floor 375 g/day in Phase A; aim at least 420 g in Phase B. Base is 425.3 g plus whey-label carbohydrate.
Fat quality	Density comes mainly from olive oil and natural peanut butter, not repeated butter/ghee additions.
Sodium	Measure salt consistently. No bouillon, blended stock, Worcestershire, Caesar, oyster sauce, fish sauce or seasoning packets.
Digestion swap	If lentils are the problem, replace 20 g lentils DRY with 20 g rice DRY . Calories stay near-even while fibre falls about 2 g.

Daily protein-source breakdown

Source	Protein	Share	Control
Chicken thigh	39.4 g	22.4%	Ceiling: 60 g protein from chicken, approximately 300 g RAW thigh per day.
Eggs	18.9 g	10.8%	Three whole eggs per day.
Milk	18.0 g	10.2%	500 mL per day.
Greek yogurt	16.5 g	9.4%	150 g per day.
Owned whey	24-25 g	13.7-14.2%	One scoop; label controls exact value.
Lentils	14.8 g	8.4%	60 g DRY per standard day.
Rice + oats	24.3 g	13.8%	Counted because it is real protein, although not primary.
Peanut butter	6.7 g	3.8%	Counted as required; still used mainly for fat/calories.
Vegetables + fruit	13.2 g	7.5%	Counted, not treated as zero.
Total	175.7-176.7 g	100%	Chicken carries less than one quarter of the daily protein.

4. Shopping list - Costco anchored, not Costco limited

Recommended route: Costco Burlington + Food Basics Milton most weeks. Add Iqbal Erin Mills only for lentil/spice restocks or when its boneless chicken is at or below \$6.25/lb. This obeys the Costco-plus-two-store cap without turning grocery shopping into a six-store project.

Product, price, audit, value and storage table

Item	Store	Pack size	Pack price	Channel	Price status + source	Ingredient audit status + evidence	Cost analysis	Verdict	Storage plan	Priority tier + job
Kirkland halal boneless skinless chicken thighs	Costco Burlington	about 2.1 kg	\$36.99	Same-Day (marked up)	VERIFIED-DIRECT - direct product; accessed September 3, 2026; Burlington delivery area; final price by weight.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - raw unseasoned chicken.	\$36.99 / (2,100 g x 19.7% protein) x 100 = \$8.94 / 100 g protein	BUY. Main meat; current Iqbal price is effectively tied.	Cook 1.2 kg RAW; freeze about 900 g RAW on day one.	Tier 1 - portable meal protein.
Selection large eggs	Food Basics Milton	30 eggs	\$9.59	other retailer	VERIFIED-DIRECT - direct product; accessed September 3, 2026; select Milton store.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - shell eggs.	\$9.59 / (30 x 6.3 g) x 100 = \$5.07 / 100 g protein	BUY at Food Basics. Slightly cheaper than surfaced Costco Same-Day pricing.	Refrigerate; use 21, carry 9 forward.	Tier 1 - protein, choline, breakfast portability.
Beatrice 2% milk	Food Basics Milton	4 L	\$6.44	other retailer	VERIFIED-DIRECT - direct retailer result accessed September 3, 2026; Milton selection. Price can vary by store.	INGREDIENTS VERIFIED FROM LABEL - Beatrice label lists partly skimmed milk, vitamin A palmitate and vitamin D3.	\$6.44 / (16 x 9 g) x 100 = \$4.47 / 100 g protein	BUY at Food Basics. Do not pay the surfaced Costco Same-Day premium.	Refrigerate; use 3.5 L, carry about 0.5 L.	Tier 1 - liquid calories, dairy protein, vitamin D.
Oikos PRO plain 0% Greek yogurt	Costco Burlington	2 x 750 g	\$14.18	Same-Day (marked up)	VERIFIED-DIRECT - direct product; accessed September 3, 2026; Burlington delivery area.	INGREDIENTS VERIFIED FROM LABEL - Oikos label lists skim milk and active bacterial cultures; match the tub before purchase.	\$14.18 / (1,500/175 x 19 g) x 100 = \$8.71 / 100 g protein	BUY. High protein without another chicken meal.	Refrigerate; use 1.05 kg, carry 450 g.	Tier 1 - non-chicken protein and easy night meal.
Kirkland Thai Hom Mali jasmine rice	Costco Burlington	8 kg	\$26.09	Same-Day (marked up)	VERIFIED-DIRECT - direct product; accessed September 3, 2026; Burlington delivery area.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - plain dry white rice.	\$4.83/week consumed (1.48 kg DRY); protein-cost metric not meaningful.	BUY. Dense, low-fibre carbohydrate base that suits Phase A.	Dry pantry; about 5.4 baseline weeks per bag.	Tier 1 - carbohydrate floor and calorie density.
Plain dry red or brown lentils	Iqbal Foods Mississauga	about 1.8 kg	\$5.99	other retailer	ESTIMATE — CHECK IN STORE - typical GTA ethnic-grocer bulk price; confidence medium; check shelf	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - buy a bag listing only lentils.	\$5.99 / (1,800 g x 24.6% protein) x 100 = \$1.35 / 100 g protein	BUY. Cheapest substantial non-chicken protein; keep portions moderate for digestion.	Dry pantry; about 4.6 weeks per bag.	Tier 1 - fibre, carbohydrate and plant protein.

Item	Store	Pack size	Pack price	Channel	Price status + source	Ingredient audit status + evidence	Cost analysis	Verdict	Storage plan	Priority tier + job
					tag and package size.					
Plain large-flake rolled oats	Costco Burlington	4.54 kg	\$11.34	Same-Day (marked up)	ESTIMATE — CHECK IN STORE - recently surfaced Costco Same-Day listing; confidence medium; check Burlington price.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - plain rolled oats only.	\$1.05/week consumed (420 g DRY).	BUY. Cheap shake carbohydrate and fibre; do not increase while appetite is poor.	Dry pantry; about 10.8 weeks per bag.	Tier 1 - breakfast carbohydrate and fibre.
Kirkland natural peanut butter	Costco Burlington	2 x 1 kg	\$13.61	Same-Day (marked up)	VERIFIED-DIRECT - direct product ; accessed September 3, 2026; Burlington delivery area.	INGREDIENTS VERIFIED FROM LABEL - retailer product identifies Valencia-peanut natural peanut butter; buy only if jar ingredient list is peanuts only.	\$1.19/week consumed (175 g AS PACKAGED); it is a non-primary protein food.	BUY. High-density unsaturated fat; weigh it because spoon estimates drift.	Refrigerate after opening if label directs; stir first.	Tier 1 - compact calories and unsaturated fat.
Summum extra virgin olive oil	Costco Burlington	3 L	\$31.77	Same-Day (marked up)	VERIFIED-DIRECT - direct product ; accessed September 3, 2026; Burlington delivery area.	INGREDIENTS VERIFIED FROM LABEL - product listing identifies extra virgin olive oil; confirm one-ingredient label.	\$2.62/week consumed (about 247 mL).	BUY. Main density lever; superior fit to adding butter or ghee.	Cool dark pantry; portion with scale, not free-pour.	Tier 1 - calorie density, mostly unsaturated fat.
Kirkland organic frozen mixed vegetables	Costco Burlington	2.5 kg	\$14.74	Same-Day (marked up)	VERIFIED-DIRECT - direct product ; accessed September 3, 2026; Burlington delivery area.	INGREDIENTS VERIFIED FROM LABEL - listing names carrots, corn, green beans and peas; no sauce or seasoning.	\$13.41/week consumed (2.275 kg; remaining 225 g freezes inside turkey portions).	BUY. One bag covers the whole prep with no spoilage.	Keep frozen; cook only what goes into boxes.	Tier 1 - produce floor and fibre.
Bananas	Food Basics Milton	about 1.0 kg purchased	\$1.52/kg	other retailer	VERIFIED-DIRECT - direct product ; accessed September 3, 2026; select Milton store.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - fresh bananas.	About \$1.52/week.	BUY. Cheap shake carbohydrate; freeze peeled ripe pieces if needed.	Counter until ripe; freeze peeled in 120 g bags.	Tier 1 - compact produce and shake texture.
Natural seedless raisins	Food Basics Milton	750 g	\$7.99	other retailer	ESTIMATE — CHECK IN STORE - current Food Basics listing/flyer result; confidence medium; check Milton price and expiry.	INGREDIENTS VERIFIED FROM LABEL - Sun-Maid product information describes plain dried grapes; buy only if the bag ingredient list is raisins with no gelatin or flavour coating.	\$2.98/week consumed (280 g AS PACKAGED).	BUY. Portable carbohydrate with almost no meal volume.	Sealed pantry; pre-bag 14 x 20 g.	Tier 2 - appetite-limited carbohydrate.
Kirkland 100% pure liquid honey	Costco Burlington	3 x 750 g	\$15.88 sale	Same-Day (marked up)	VERIFIED-DIRECT - direct product ; accessed September 3,	INGREDIENTS VERIFIED FROM LABEL - product is identified as	About \$1.75-\$2.10/week consumed , depending on whey-label correction.	BUY while on sale. Precise low-volume calorie adjustment.	Pantry; one bottle open, two sealed.	Tier 2 - exact calorie correction and pre-workout carbohydrate.

Item	Store	Pack size	Pack price	Channel	Price status + source	Ingredient audit status + evidence	Cost analysis	Verdict	Storage plan	Priority tier + job
					2026; sale shown ending September 13, 2026; Burlington delivery area.	100% pure liquid honey.				
Plain ground turkey - smallest pack	Food Basics Milton	400-500 g	\$7.99 assumed	other retailer	ESTIMATE — CHECK IN STORE - smallest GTA supermarket pack; confidence low; buy only if pack is 400-500 g and under \$10.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - raw unseasoned ground turkey only.	At \$7.99/450 g and 21% protein: \$8.46 / 100 g protein.	BUY ONCE. Trial only; the plan never depends on liking it.	Cook the full pack Sunday; eat one portion Friday, freeze three.	Tier 3 - controlled variety experiment.
Onion, lemons, fresh garlic	Food Basics Milton	1 small bag onion; 2 lemons; 1 bulb	\$5-\$7 total	other retailer	ESTIMATE — CHECK IN STORE - ordinary produce pricing; confidence medium.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - fresh produce.	About \$3-\$5/week used.	BUY. Builds flavour without sauces, stock or hidden animal ingredients.	Pantry/fridge as appropriate.	Tier 2 - adherence and flavour.
Salt, black pepper, cumin, paprika, turmeric	Iqbal Foods Mississauga	single-spice bags/jars	\$6-\$12 restock	other retailer	ESTIMATE — CHECK IN STORE - pack sizes vary; confidence medium.	PLAIN SINGLE-FOOD PRODUCT — NO BANNED-INGREDIENT RISK - buy only single-ingredient spices; reject blends, bouillon and seasoning packets.	Under \$1/week used.	BUY AS NEEDED. Avoid Worcestershire, Caesar, oyster/fish sauce and blended stock.	Dry pantry, tightly sealed.	Tier 2 - repeatable flavour with visible compliance.

Budget boundary and cash flow

Bucket	Amount	Meaning
Recurring perishables and trial packs bought this trip	\$99.44	Chicken, eggs, milk, yogurt, frozen vegetables, bananas, raisins and turkey. Several have carry-forward stock.
One-time pantry/bulk outlay	\$110.68	Rice, oats, peanut butter, olive oil, honey, lentils and basic spices. Shared household staples can reduce this sharply.
Restaurant dinner	\$20.00 + \$2.60 HST	\$22.60 cash; prepared restaurant food is generally 13% HST in Ontario.
Zero-pantry launch cash	about \$232.72	This is not the weekly cost. It includes roughly \$125-\$130 of food that remains for later weeks.
Food actually consumed in baseline week	about \$104.60	Includes restaurant tax; excludes owned whey and supplements. Expected range \$100-\$120 with price/portion variation.
Typical later-week cash spend	\$105-\$160	Rotating restocks make cash lumpy. Keep a \$160 envelope; unused room is not an instruction to spend.

Shared-household flags: rice, olive oil, spices, onions, garlic, lemons and sometimes milk may be shared. The table charges the full packs to your launch cart, but the consumed-week calculation charges only your measured share.

\$125 / \$160 / \$200 paired substitutions

Tier	Paired change	Expected cost	Recomputed nutrition proof
\$125 value	Replace the Saturday restaurant bowl with one standard Box B. Keep all other measured quantities. Buy pantry items only when depleted.	About \$86-\$105 consumed; most weeks stay under \$125 cash after pantry is established.	Exactly the base formula: 3,300 kcal after whey-label correction; 175.7-176.7 g protein.
\$160 baseline	One Chipotle bowl Saturday; use Costco frozen vegetables/Oikos and the two-stop route. Add 15 g honey only when the bowl looks like a standard portion.	About \$105 consumed; typical cash \$105-\$160 because bulk restocks rotate.	Six exact 3,300-kcal days. Restaurant day about 3,167-3,467 kcal; weekly average about 3,281-3,324 kcal/day . Protein weekly average remains about 176-179 g/day .
\$200 convenience	Use chicken breast swap: each day replace 200 g RAW thigh with 175 g RAW breast + 17 g olive oil. Spend the rest on pre-cut produce, individual plain yogurt or grocery delivery only when each label passes the audit.	Usually \$125-\$160 consumed; \$200 is a ceiling, not a goal.	Breast + oil swap is approximately calorie/protein matched. Same baseline and restaurant-day ranges as \$160.

Tax treatment reference: [CRA basic-groceries guidance](#). Costco channel policy: [Costco Same-Day pricing policy](#).

5. Seven-day meal plan and prep-compatible recipes

Base day after whey-label correction: 3,300 kcal, about 176 g protein, at least 425 g carbohydrate before the honey correction, about 101 g fat and about 36.6 g fibre. Six eating points spread protein across the day without making chicken the entire plan.

Standard weekday timing and measured meals

Time	Meal	Measured quantity	kcal	Protein g	Carb g	Fat g
05:50	Dense breakfast shake	60 g DRY oats; 25 g AS PACKAGED natural peanut butter; 120 g EDIBLE RAW banana; 20 g AS PACKAGED honey; 1 scoop about 30 g AS PACKAGED whey; water/ice	549 + Wkcal	15.9 + Wprotein	90.3 + Wcarb	17.6 + Wfat
09:15	Work snack	250 mL milk; 2 eggs AS PACKAGED , hard-boiled; 20 g raisins AS PACKAGED	334	22.2	28.6	14.7
12:30	Work Box A	100 g RAW-equivalent chicken thigh; 100 g DRY-equivalent rice; 30 g DRY-equivalent lentils; 175 g frozen vegetables AS PACKAGED ; 15 g olive oil AS PACKAGED	875	39.5	118.3	26.6
16:15	Pre-workout	1 egg AS PACKAGED ; 20 g raisins AS PACKAGED ; 15 g honey AS PACKAGED	177	7.0	28.6	4.9
19:30	Home Box B	100 g RAW-equivalent chicken thigh; 130 g DRY-equivalent rice; 30 g DRY-equivalent lentils; 175 g frozen vegetables AS PACKAGED ; 20 g olive oil AS PACKAGED	1,029	41.6	142.3	31.8
21:30	Night dairy	250 mL milk; 150 g Oikos PRO plain yogurt AS PACKAGED	221	25.5	17.2	5.0

The default rows total 3,186 kcal before whey. Apply the honey correction in Section 2. Whey macros remain + Wkcal / + Wprotein / + Wcarb / + Wfat.

All seven days

Day	Schedule	Prepared meals	Food-safety position
Monday	Base timing and all six meals.	Box A + Box B	Fridge
Tuesday	Base timing and all six meals.	Box A + Box B	Fridge
Wednesday	Base timing and all six meals.	Box A + Box B	Fridge
Thursday	Base timing and all six meals.	Box A + Box B	Thaw Wednesday night
Friday	Base through pre-workout. Dinner is one turkey-trial Box B.	Box A + turkey Box B	Thaw Thursday night
Saturday	Move times later. Box A mid-afternoon; Chipotle bowl at dinner.	Box A only	Thaw Friday night
Sunday	Move times later. Eat Box A and Box B from the fresh batch.	Box A + Box B	Fresh Sunday

Box A - lemon-cumin chicken rice-lentil bowl

Per box: 100 g **RAW-equivalent** chicken thigh; 100 g **DRY-equivalent** jasmine rice; 30 g **DRY-equivalent** lentils; 175 g frozen vegetables **AS PACKAGED**; 15 g olive oil **AS PACKAGED**. Season with fresh lemon/garlic, plain cumin, paprika, turmeric, salt and pepper.

Macros: about 875 kcal, 39.5 g protein, 118.3 g carbohydrate, 26.6 g fat.

Box B - larger evening version

Per box: same as Box A except rice is 130 g **DRY-equivalent** and olive oil is 20 g **AS PACKAGED**.

Macros: about 1,029 kcal, 41.6 g protein, 142.3 g carbohydrate, 31.8 g fat.

Finished-batch weighing procedure - do not assume cooking yield

1. Record raw/dry batch inputs before cooking: chicken 1,200 g **RAW**, rice 1,480 g **DRY**, lentils 390 g **DRY**.
2. After cooking and brief steam release, weigh each finished cooked batch in a tared bowl.
3. Use the formula below to portion the correct raw/dry equivalent even when water loss/gain differs.

Cooked portion weight = finished cooked batch weight x planned raw-or-dry equivalent / total raw-or-dry input
Chicken portion = finished chicken weight x 100 / 1,200
Box A rice portion = finished rice weight x 100 / 1,480
Box B rice portion = finished rice weight x 130 / 1,480
Lentil portion = finished lentil weight x 30 / 390

Per-container macros can be recomputed as total batch macros x cooked portion weight / finished cooked batch weight.

Shake protocol

Base shake

60 g oats **DRY**, 25 g natural peanut butter **AS PACKAGED**, 120 g banana **EDIBLE RAW**, corrected breakfast honey amount **AS PACKAGED**, one about-30 g scoop whey **AS PACKAGED**, water and ice.

Default before correction: 549 kcal + Wkcal; 15.9 g protein + Wprotein; 90.3 g carbohydrate + Wcarb; 17.6 g fat + Wfat.

Short-day scale-up: add one full PB-Honey Blend module. When protein is short instead, add a second scoop and then remove calories equal to the second scoop from honey/oil using the same formula so the day does not drift.

INGREDIENTS VERIFIED FROM LABEL - current Perfect Sports DIESEL product information should be compared with the physical tub; do not use this plan until the tub ingredient list is checked for pork-derived ingredients. The current family does not disclose such an ingredient, but formulas can change.

One meal out - Saturday Chipotle

Order

Chicken, white rice, black beans, fajita vegetables, fresh tomato salsa, roasted chili-corn salsa, cheese and guacamole. No carnitas, steak, barbacoa, queso, vinaigrette or limited-time sauce.

Planning midpoint: about 985 kcal and 56 g protein from published component values. Use a practical range of **850-1,150 kcal and 45-65 g protein** because restaurant scoops vary. A standard-looking bowl plus 15 g honey later approximately replaces Box B. If it is visibly small and hunger remains, use half a PB-Honey module. Do not compensate for one large bowl by starving the next day.

INGREDIENTS VERIFIED FROM LABEL - [Chipotle ingredients](#) and [allergen page](#); the Canadian chain states fish/shellfish are not used as ingredients, carnitas is pork, and cheese uses vegetable rennet. Cross-contact and portion variation remain possible.

Ground turkey trial - once

Turkey keema-style rice cup

Cook one 400-500 g pack plain ground turkey **RAW** with 300 g frozen vegetables **AS PACKAGED**, 100 g onion **RAW**, 8 g olive oil **AS PACKAGED**, fresh garlic, cumin, paprika, turmeric, salt and pepper. Weigh the finished mixture and divide into four equal cooked portions.

Friday Box B uses one turkey portion, 100 g extra frozen vegetables **AS PACKAGED**, 130 g rice **DRY-equivalent**, 30 g lentils **DRY-equivalent** and 18 g olive oil **AS PACKAGED**. Freeze the other three turkey portions.

Fallback: if disliked, use the standard Box B. Nothing else changes. Because turkey labels vary, calculate its recipe macros from the package: full-pack label macros + vegetables + onion + 8 g oil, divided by 4.

Three under-15-minute mid-week options

Option	Measured build	Use
Backup dense shake	1 scoop whey AS PACKAGED + 250 mL milk + 60 g oats DRY + 30 g peanut butter + 20 g honey	Replace a missed meal, then subtract its actual macros from the day; do not stack blindly.
Microwave egg-rice bowl	One thawed rice/lentil/veg box + 2 eggs AS PACKAGED , microwaved separately until fully hot	Emergency protein when chicken portion is missing.
Yogurt-raisin module	200 g plain yogurt AS PACKAGED + 45 g raisins AS PACKAGED	The named +256 kcal module; zero cooking.

6. Sunday prep workflow

13

Main meal containers, about 950 mL

3

Small turkey containers, about 300 mL

75-85 min

Active work

1 h 55 min

Target wall-clock

Clock	Action	Parallel work / control
0:00	Preheat oven to 220 C. Start rice cooker batch 1. Start lentils in Instant Pot.	Label 13 main containers by day and A/B.
0:10	Season 1,200 g chicken RAW ; spread on two trays.	Use lemon, garlic and single spices only.
0:20	Chicken into oven. Start the entire ground-turkey trial in a skillet.	Do not use stock, bouillon, premade sauce or seasoning packet.
0:35	Turkey mixture finishes; spread shallow to stop steaming.	Start rice batch 2 if cooker capacity requires it.
0:45	Steam/microwave frozen vegetables.	Keep vegetables firm enough to survive reheating.
0:55	Verify chicken reaches 74 C internal; remove and rest briefly.	Instant Pot lentils should be depressurized and drained if watery.
1:05	Weigh every finished cooked batch in tared bowls.	Write finished weights on the prep sheet.
1:15	Portion using the yield formulas, then add weighed olive oil to each box.	Build 7 Box A, 5 standard Box B and 1 turkey Box B.
1:40	Close shallow containers once food has stopped actively steaming.	Move to fridge/freezer promptly; never wait for room temperature.
1:55	Final labels, cleanup and temperature check.	All food is cold-stored within two hours of cooking.

Sunday fridge/freezer map

Destination Sunday	Containers	Move / eat
Fridge	Sunday A+B; Monday A+B; Tuesday A+B; Wednesday A+B - 8 main containers	Eat in labelled order.
Freezer	Thursday A+B; Friday A + turkey B; Saturday A - 5 main containers	Wednesday night: move Thursday pair to fridge. Thursday night: Friday pair. Friday night: Saturday A.
Freezer	Three remaining 300 mL turkey portions	Keep for later weeks; thaw in fridge only.

7. Supplements - buy and skip

Product	Decision and use	Price / channel / status	Ingredient audit
Plain creatine monohydrate	BUY. 5 g/day; no loading required. Powder form; mix into any drink. The ISSN position stand supports 3-5 g/day maintenance.	Leanfit 1 kg: recent Same-Day price about \$27.80 but current listing is out of stock. Same-Day (marked up); ESTIMATE - CHECK IN STORE; confidence medium. Do not pay a Creapure premium.	INGREDIENTS VERIFIED FROM LABEL - Costco listing ; listing identifies vegan unflavoured creatine product. Confirm physical tub lists creatine monohydrate only.
Vitamin D3 1,000 IU / 25 mcg	BUY IF BUDGET ALLOWS. Planned diet supplies roughly 12-14 mcg/day, mainly milk plus eggs, versus Health Canada RDA 15 mcg and UL 100 mcg for age 19-30. One tablet gives a total near 37-39 mcg/day, below the UL. This is general intake guidance, not treatment. Only serum 25-hydroxyvitamin D testing establishes status.	\$8.09 / 260 tablets direct from Webber at access date; other retailer; VERIFIED-DIRECT. Shipping may apply.	INGREDIENTS VERIFIED FROM LABEL - Webber label ; cellulose, dicalcium phosphate and vegetable-grade magnesium stearate; no gelatin.
Triple-strength omega-3	BUY IF BUDGET ALLOWS. One softgel supplies 600 mg EPA + 300 mg DHA. The food plan contains near-absent, not literally zero, EPA/DHA because seafood is excluded and eggs contribute only traces.	\$22.49 / 80 softgels direct from Webber at access date; other retailer; VERIFIED-DIRECT. Costco 200-count may be better value if warehouse price is competitive.	INGREDIENTS VERIFIED FROM LABEL - Webber label ; manufacturer Q&A and Costco label specify bovine gelatin, not porcine.
BCAA/EAA, glutamine, mass gainer, greens, collagen	SKIP. Protein is already sufficient; mass gainer is expensive oats/sugar/fat; collagen is a poor primary muscle-building protein and adds another animal-source audit problem.	No purchase.	INGREDIENTS UNAVAILABLE — DO NOT RECOMMEND for unspecified products.

Product	Decision and use	Price / channel / status	Ingredient audit
Premium “Creapure” creatine	SKIP. The useful ingredient is still creatine monohydrate; do not pay roughly 2-3x for branding.	No purchase.	INGREDIENTS UNAVAILABLE — DO NOT RECOMMEND for unspecified products.

Evidence: [ISSN creatine position stand](#) and [Health Canada vitamin D table](#).

8. GTA non-Costco price comparison

Store	Evidence checked	Action
Costco Burlington	Chicken thighs \$17.58/kg; rice 8 kg \$26.09; yogurt \$14.18/1.5 kg; frozen vegetables \$14.74/2.5 kg.	Use. Bulk anchor. Same-Day prices are marked up, so warehouse should be checked rather than invented.
Iqbal Foods, Erin Mills	Boneless thighs \$7.89/lb (\$17.39/kg) and breast \$9.15/lb on the direct storefront on access date.	Conditional. Current thighs are essentially tied with Costco Same-Day; go for lentils/spices or a chicken sale at or below \$6.25/lb.
Food Basics Milton	Eggs 30 for \$9.59; bananas \$1.52/kg; milk listing used for the route.	Use weekly. Best nearby fill-in store for dairy, eggs and produce.
No Frills	Surfaced halal bulk chicken had attractive unit pricing but selected listings were out of stock.	Do not build the plan around it. Buy only when direct local inventory is visible.
Nations Fresh Foods Hamilton	Current flyer access did not expose a clearly superior, directly verifiable staple price for this basket.	Skip the weekly route. The drive is not justified by this week's evidence.
Adonis Mississauga	Flyer reports around \$5.99/lb chicken breast in third-party extraction; location/offer mapping was uncertain.	Check only when nearby. ESTIMATE - CHECK IN STORE; not strong enough for the core route.
AI Premium Mississauga	Recent flyer extraction also suggested around \$5.99/lb breast, but direct product-level confirmation was unavailable.	Check only when nearby. ESTIMATE - CHECK IN STORE; do not make a separate weekly drive.

What not to buy at Costco this week: milk and eggs, because the directly surfaced Food Basics prices are lower; do not make a Costco chicken purchase automatically when Iqbal or a local flyer is below \$6.25/lb. **What to buy at Costco:** rice, yogurt, peanut butter, olive oil, frozen vegetables and sale honey because they simplify the plan and have useful bulk economics.

Retail research links: [Iqbal direct storefront](#); [No Frills halal category](#); [Nations flyer](#); [Adonis flyer](#); [AI Premium flyer](#).

9. Weekly adjustment and troubleshooting rules

Situation	Mechanical response
7-day average has not moved across two compliant weeks	Add one +250 module. Use Rice Drive first unless stomach volume is the problem; then use PB-Honey Blend.
Projected finish exceeds 195 lb	Only after two consecutive weekly projections and at least 90% intake adherence: remove the last-added +250 module.
Waist exceeds baseline +4 cm while weight projection is on target	Report that body-composition cost is rising. Options: continue unchanged to honour scale target, or voluntarily accept a lower finish. No automatic calorie reduction.
Too full to finish meals	Replace the highest-volume part first: reduce 20 g lentils DRY and add 20 g rice DRY ; blend the shake thinner; use PB-Honey module rather than yogurt-raisin. Do not drop the whole meal.
Protein missed on one day	Do not “repay” protein tomorrow. Before bed, use enough plain yogurt or whey to reach at least 165 g, then resume normal target next day. Correct calories with honey/oil if a second scoop is used.
Constipation/bloating after intake increase	Hold calories. Check fluids and meal spacing; keep fibre at 30-38 g rather than pushing higher; make the lentil-to-rice swap; spread oil instead of taking it at once.
Loose stool	First reduce concentrated liquid intake speed, excess sweetener and sudden dairy boluses; split the shake. Keep calories by moving them into rice/oil.
Progress stalls while sleep is inconsistent	Confirm calorie adherence and two-week rolling trend. Do not add calories because of one tired week. If weight is flat despite verified intake, add +250; if training performance alone is poor, food may not be the limiting variable.
Missed work meal	Use the backup dense shake or thawed reserve box. Do not replace it with unmeasured takeout.

10. Food safety - mandatory weekly rules

Sunday

- ☐ Use shallow containers.
- ☐ Close and refrigerate/freezer promptly once active steaming stops.
- ☐ Everything enters cold storage within two hours of cooking.
- ☐ Do not leave food out until room temperature.
- ☐ Freeze Thursday-Friday-Saturday boxes immediately.

Daily

- ☐ Thaw only in the refrigerator.
- ☐ Reheat poultry/rice dishes to 74 C / 165 F internal.
- ☐ Reheat only the portion being eaten.
- ☐ Discard food left above refrigerator temperature for unsafe periods.
- ☐ Cooked rice gets the same prompt cooling treatment because room-temperature rice can support *Bacillus cereus*.

Sunday food is not treated as Friday refrigerator food. Health Canada guidance is roughly 2-4 days for refrigerated leftovers depending on the food. The Thursday, Friday and Saturday containers go straight to the freezer on Sunday.

Mother's Sunday cooking sheet - copy this section by itself

What to cook

- **Chicken:** 1.2 kg raw boneless skinless chicken thighs.
- **Rice:** 1.48 kg dry jasmine rice, about 7 1/2 level cups depending on the cup.
- **Lentils:** 390 g dry lentils, about 2 level cups.
- **Frozen vegetables:** use the full 2.5 kg bag across the chicken boxes and turkey mixture.
- **Olive oil:** weigh 231 g total for the prepared boxes and turkey mixture, about 17 tablespoons. Keep the rest for shakes/modules.
- **Turkey trial:** one 400-500 g pack plain ground turkey, 100 g chopped onion and 300 g frozen vegetables.

Seasoning - no sauces or stock

Use fresh lemon, fresh garlic, plain cumin, paprika, turmeric, black pepper and measured salt. Do not use bouillon, broth cubes, Worcestershire sauce, Caesar dressing, oyster sauce, fish sauce or a mixed seasoning packet.

Order

1. Heat oven to 220 C.
2. Start the rice in the rice cooker. If it does not fit, cook it in two batches.
3. Cook the lentils in the pressure cooker until tender but not mushy.
4. Season the chicken and bake on two trays until the thickest pieces reach 74 C inside.
5. While the chicken cooks, brown the whole pack of turkey with the onion, 300 g vegetables, 8 g olive oil and the plain spices.
6. Steam or microwave the rest of the vegetables.
7. Weigh the finished cooked chicken, rice and lentils separately before filling boxes. Do not guess the cooked amount.

How to divide the cooked food

Each chicken serving = finished chicken weight divided by 12
Each lentil serving = finished lentil weight divided by 13
Rice for each small lunch box = finished rice weight x 100 / 1,480
Rice for each large dinner box = finished rice weight x 130 / 1,480

Make **7 small lunch boxes**, **5 regular large dinner boxes** and **1 turkey dinner box**. Put 175 g vegetables into each regular box. The turkey dinner gets one quarter of the turkey mixture plus 100 g extra vegetables. Add 15 g olive oil to each small box and 20 g to each regular large box. Add 18 g to the turkey dinner box.

Fridge and freezer

- **Fridge:** Sunday, Monday, Tuesday and Wednesday boxes.
- **Freezer immediately:** Thursday, Friday and Saturday boxes, plus the three unused turkey portions.
- Wednesday night move Thursday boxes to the fridge. Thursday night move Friday boxes. Friday night move Saturday's box.
- Use shallow containers. Put food into the fridge/freezer promptly once it stops steaming, always within two hours. Do not leave it out until room temperature.
- Heat each meal until the middle reaches 74 C / 165 F.

Plain-text shopping list

SHOPPING LIST – \$160 BASELINE

COSTCO – BURLINGTON

Halal boneless skinless chicken thighs - 1 pack, about 2.1 kg
Thai Hom Mali jasmine rice - 1 bag, 8 kg
Oikos PRO plain Greek yogurt - 2 x 750 g
Plain large-flake rolled oats - 1 bag, 4.54 kg
Natural peanut butter - 2 x 1 kg
Extra virgin olive oil - 3 L
Frozen mixed vegetables - 2.5 kg
100% pure liquid honey - 3 x 750 g

FOOD BASICS – MILTON

Large eggs - 30
Beatrice 2% milk - 4 L
Bananas - about 1 kg
Natural seedless raisins - 750 g
Plain ground turkey - smallest 400-500 g pack
Onions - 1 small bag
Lemons - 2
Fresh garlic - 1 bulb

IQBAL FOODS – ERIN MILLS

Plain dry lentils - about 1.8 kg
Plain cumin - 1 pack if needed
Plain paprika - 1 pack if needed
Plain turmeric - 1 pack if needed
Salt - 1 pack if needed
Black pepper - 1 pack if needed
